About Me

In my current position at nex unify co., ltd, I serve as a dedicated Flutter Mobile Developer. I lead and contribute to projects that leverage Flutter to create seamless, cross-platform mobile applications. Through this role, I've gained valuable insights into the intricacies of mobile development, ensuring that the apps I work on are not only visually appealing but also performant and scalable.

Euducation

2019 – 2022
- **Kasem Bundit University**
  - Bachelor's degree Computer Science
  - GPA 3.70 (First Class Honors)

2013–2019
- **Kasem Phitthaya School**

Career Objective

- Mobile Developer
- Web Developer
- Full-Stack
- Devops
- System Analyst (SA)

Skills

Relevant Skills

- HTML, CSS, Javascript, Go, Dart, SQL, Swift, Kotlin
- Flutter, React, NuxtJS, NestJS, NextJS, NodeJS
- Problem Solving
- Team Communication

Technical Skills

Future Skill

- ใช้ Docker ลงมือจริง Step-by-step เป็นใน 2 ชม. (Certificate)
- สร้างเว็บไซต์จากเริ่มต้นจนถึงมือโปรด้วย HTML5/CSS3/JavaScript (Certificate)

- Getting Start With Cloud and AWS Cloud ก้าวแรกสู่การรู้จัก Cloud และ AWS Cloud (Certificate)

Udemy

- Flutter & Dart - The Complete Guide [2024 Edition] (Certificate)
- NestJS Zero to Hero - Modern TypeScript Back-end Development (Certificate)

Kongraksiam

- คอร์สพัฒนาเว็บด้วย JavaScript แบบ MERN Stack

Experience

Startup Thailand League
MEGA HACKATHON 15 February Startup Thailand League 2021
February 2021

Internship
KPPrecition co.,ltd
January 2022 to March 2022 (3 month)

- **Role**
  - Full-stack (NextJS and NodeJS)

Junior Mobile Developer
Nex unify co.,ltd
April 2023 to Currently

- **Mobile Application UI Development (Responsive):**
  - Developed responsive user interfaces for a mobile application to ensure optimal functionality across various screen sizes and devices.
- **Boilerplate Setup:**
  - Established a foundational project boilerplate for streamlined development processes and consistent project structures.
- **API Integration:**
  - Integrated external APIs to connect the mobile application with external data sources, ensuring seamless data exchange.
- **Firebase Messaging Event Notification:**
  - Implemented Firebase Messaging for the reception of real-time event notifications and updates from the server.
- **Bluetooth Medical Device Connectivity:**
  - Established connectivity with Bluetooth-enabled medical devices, facilitating communication and data exchange between the application and medical equipment.
- **Flutter Library Creation:**
  - Developed a Flutter library to encapsulate reusable components and functionalities, enhancing code modularity and project scalability.
- **White Label Application Building:**
  - Constructed a white-label mobile application, allowing customization for different markets and clients while maintaining a consistent core structure.
- **Native Code Integration (Swift/Kotlin):**
  - Incorporated native code (Swift for iOS and Kotlin for Android) to optimize specific functionalities and ensure seamless integration with the respective platforms.
- **Flutter Desktop/Web Proof of Concept (POC):**
  - Executed a Proof of Concept (POC) to explore the feasibility and functionality of using Flutter for desktop and web applications.
